Earthing & lightning protection
Design & technical solutions
Furse provides world leading Earthing, Lightning and Electronic Systems Protection from our own designed and manufactured products through to risk assessment and systems design advice. Our renowned Furse range of Earthing & Lightning Protection design services provide a unique total solution.
Expertise
Specialist advice from our fully qualified technical engineers - focusing on your earthing & lightning protection issues and concerns.

Experience
Experience to provide the optimum design - one that doesn’t use more material than is necessary, saving you money.

Knowledge
Our knowledge of the latest products ensures a tailored design that can be installed using the most appropriate and up-to-date products.

Compliance, now & in the future
Furse designs comply with all recognised standards - national and international. Our engineers actively contribute to national and harmonised European / international standards, ensuring we remain at the forefront of new developments.

- BS EN/IEC 62305 Protection against lightning
- NFPA 780 Standard for the installation of lightning protection systems
- ENA TS 41-24 Guidelines for the design, installation, testing & maintenance of main earthing systems in substations
- BS EN 50522:2010 - Earthing of power installations exceeding 1k Vac
- SS 555

Markets covered:
Technical solutions
Advise, support and design

Furse have been providing design solutions for over 100 years and believe the fundamental ingredient to our success has been sharing our expertise with clients to allow informed decision making.

1. Lightning protection solutions
   - Team of experienced engineers
   - Engineered designs to meet client specifications
   - Risk assessment complying to latest standards

2. Soil resistivity surveys
   - Experienced surveyors
   - Key to creating effective earthing system
   - Multiple readings taken to ensure safe and accurate designs

3. Analysis & earthing design
   - Latest CDEGS software to optimise designs
   - Range of detailed reports to clients requirements

4. Earth resistance testing
   - Verification of earthing design through measurement
   - Experienced team of engineers with full understanding of electrode testing
Earthing and lightning protection  
Design services, site surveys and analysis

**Earthing & lightning protection solutions**
There are many benefits of coming to Furse for earthing and lightning analysis:

- Specialist advice from our fully qualified technical team, which focuses on earthing and lightning protection
- Active contribution to national and harmonised European/international standards ensures our engineers remain at the forefront of new developments in earthing and lightning protection
- Designs that comply with all relevant standards - national and international
- Our responsibility for providing a design that is safe
- Experience and the software to provide an ‘optimum’ design - one that doesn’t use more material than is necessary - saving you money
- Manufacturing experience and expertise utilising our knowledge of the products available to provide a tailored design that can be installed using the most appropriate and up-to-date products

**Soil resistivity surveys**
A comprehensive soil resistivity survey is key to creating an effective earthing system, as inadequate or erroneous soil resistivity readings are likely to result in a flawed design.

Furse site surveys take multiple accurate soil resistivity readings at various depths across the site. As these results form the basis of the whole earthing design, the experience of our engineers is critical in ensuring correct implementation of the test data.

**Analysis & earthing design**
Using the latest computer aided design & modelling software we can produce detailed or budgetary earth electrode and lightning protection system designs, in compliance with recognised standards and whatever the complexity of system required.

Full earthing analysis uses state-of-the-art software to determine the step and touch voltages, earth potential rise and fall, and hot/cold site classification of the site generated by the initial design.

**Earth resistance measurement**
Earth resistance measurement is essential to accurately determine that the installed earthing system meets the anticipated criteria laid out in the initial design.

Our technicians ensure all measurements are correctly taken and interpreted, so that the true resistance of the earthing system can be accurately determined and verified.
Earthing and lightning protection
Providing a total solution

Structural lightning protection
From Furse air termination systems including air rods and strike plates to capture lightning strikes, through to our comprehensive range of down conductors and lightning protection components which channel lightning energy safely to a Furse earth termination network.

- Air termination systems
- Lightning protection conductors
- Conductor clips, clamps and holdfasts
- Bimetallic connection components

Earthing
A combination of Furse earth electrodes, soil conditioning, conductors and equipotential bonding bars provide an effective, low resistance dissipation from the lightning protection system to earth.

- Earth rods and conductor systems
- Mechanical earth clamps and bonds
- Soil conditioning agents
- Earth bars and equipotential bonding

Electronic systems protection
Our exhaustive range of equipotential bonding and transient overvoltage SPDs providing fully coordinated protection against transient overvoltages on all incoming and outgoing metallic service lines including power, data, signal & telecoms.

- Lightning Equipotential Bonding SPDs
- Mains power transient overvoltage SPDs
- Data, signal & telecommunication lines SPDs
- DC power & photovoltaic

FurseWELD - Exothermic welding
FurseWELD exothermic welding is a cost efficient, self-contained system that uses the high temperature reaction of powdered copper oxide and aluminium, within a mould, to form permanent electrical connections.

- Moulds
- Powder
- Handle clamps
- Accessories
Case Studies
Sharing our expertise

Past projects include:

**Oil & gas / Petrochemical**
- Oil Fields in Toha, China
- Pertamina Gas / Petrotel Depot, Indonesia
- Asab Full Field Development, UAE
- Dorra Gas Field Development, Saudi Arabia
- Jubail Chevron Phillips (JCP)
- Petrochemical Plant, Saudi Arabia

**Utilities**
- Waste Water Treatment Plant, Shoiba, Saudi Arabia
- JAFZA Desalination Plant, UAE
- Hammas Power Station, Algeria
- Shuwaikh Desalination Plant, Kuwait
- Tianwan Nuclear Power Plant, China
- Mombassa Substation, Kenya
- Kapichira Hydo-Power Station, Malawi

**Rail & infrastructure**
- Bahrain Int’l Airport Expansion
- Shanghai Metro, China
- Kowloon Rail Link, Hong Kong
- New Terminal, Seeb Airport, Oman
- Circle Line, Mass Rapid Transit System, Singapore
- Channel Tunnel Rail Link, UK

**High tech & industrial**
- Taiwan Semiconductor Manufacturing Corporation, China
- China Telecom
- Intel Plant, High Tech Kulim, Malaysia
- Kuala Lumpur Telecoms Tower, Malaysia
- Seagate Semiconductor Plant, Singapore
- Alexandra Technopark, Singapore
- Motorola Factories, Singapore
- Najran Cement Factory, Saudi Arabia
- Merck, Sharp & Dohme Pharmaceutical Plant, Singapore
- Alfred McAlpine Quarry Products, UK

**Sports & recreation**
- MGM Grand Hotel & Complex, Macau, China
- Bahrain Opera House
- Azizia Mall, Kuwait
- Disneyland Hong Kong
- Sebang International Formula One Circuit, Malaysia
- Manchester United Training Ground, UK
- Grand Plaza Hotel, Singapore
- Dubai Sports City Complex, UAE

**Commercial construction**
- Bahrain Financial Harbour
- Emirates Towers, Bahrain
- Petronas Twin Towers, Malaysia
- Oman Arab Bank, Oman
- Kuala Lumpur Stock Exchange, Malaysia
- Graha Energy Building, Indonesia
- Central Market, Abu Dhabi
- Canary Wharf, London, UK
- Highland Distilleries Co plc, UK
- Barwa Financial District, Qatar
- London Stock Exchange
- Royal Bank of Scotland

**Government & public sector**
- Royal College of Surgeons, Muharraq, Bahrain
- Ministry of Foreign Affairs, Brunei
- Singapore Embassy, China
- Prime Minister’s Office, Putrajaya, Malaysia
- University Institute of Technology, Ijok-Selangor, Malaysia
- Ministry of Finance Administrative Building, Malaysia
- Mater Dei General Hospital, Malta
- International Maritime College, Oman
- Al Jaber Hospital, Kuwait
- Police Headquarters, Kampong Java Road, Singapore
- British Library, London, UK
