

## UT3M INSTALLING TOOL

for all 5/8" COMPRESSION CONNECTORS for #8 to 4/0

### PARTS LIST & MAINTENANCE

This lightweight (35 ounces) pocket size tool features SHURE-SQUEEZER® design - a proven ratchet and pawl mechanism which assures proper compression before the crimp jaws release.

It installs the complete line of 5/8" self-insulated and bare SHURE-SPLICER® service entrance connectors, UB 214 H-TYPE compression taps, one hole & two hole lugs, the RRK series underground waterproof splices, pin terminals, high voltage splices, tees & lugs, and the copper 'C' TAP series AWG 4 and 6.

Installation time is quicker because one stroke of the tool develops a full circumferential compression.

The tool frame is precision cast of high carbon tool steel with plastisol cushioned handles.

Because the tool has relatively few moving parts, maintenance consists of an occasional oiling of pivot and link pin areas.

### MAINTENANCE

#### LUBRICATION

The tool should be oiled occasionally with a good grade of lubricating oil in the pivot and link pin areas.
