

RPT MOPTITE® Poke Through Cover Installation Instructions for

Catalog Numbers: RPT-CVR-SW-TALM & RPT-CVR-SW-TBRS

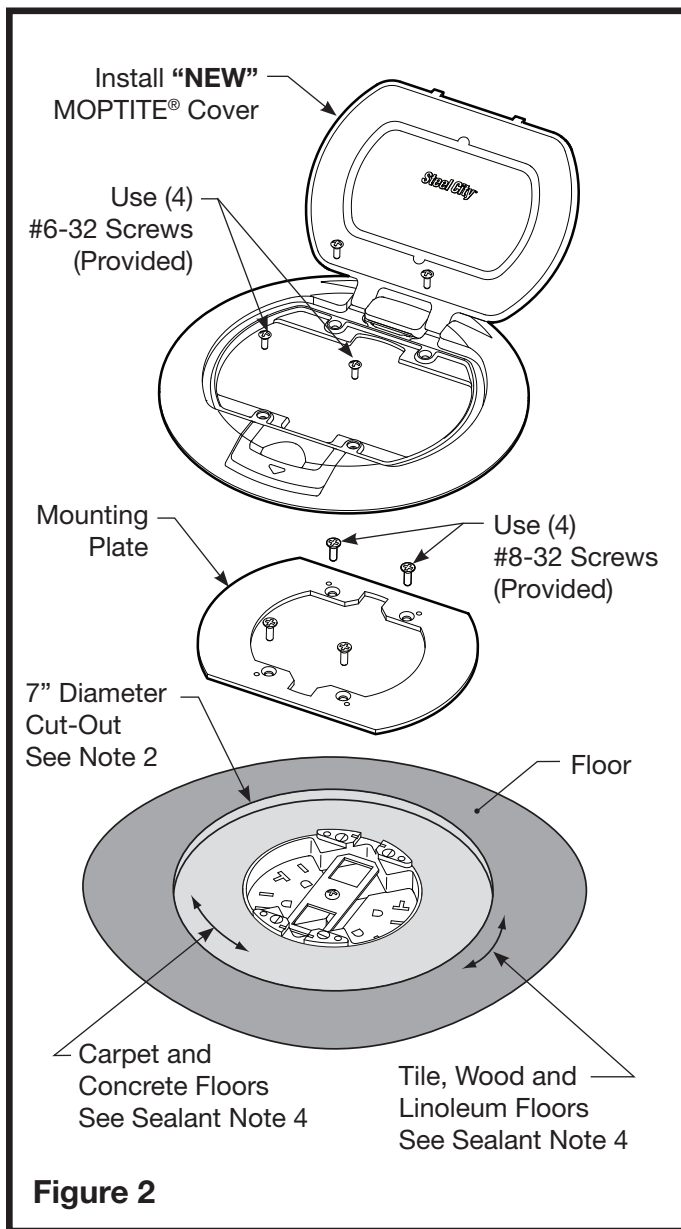

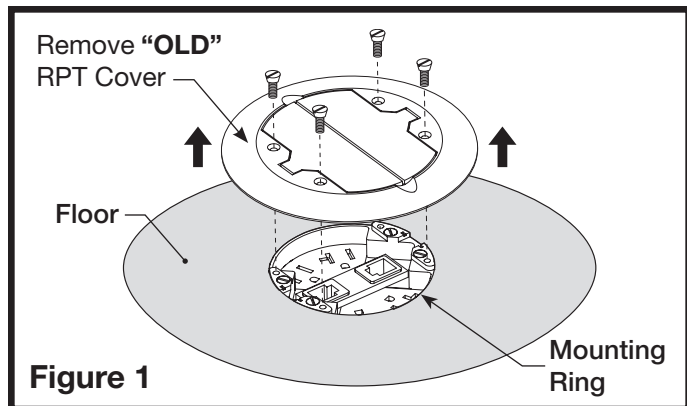

This instruction describes the required steps for a field replacement of an installed RPT (Recessed Poke Through) System Cover to a RPT MOPTITE® (Recessed Poke Through) System Cover.

Tools Required: Flat head and Phillips Screw Drivers. Utility knife to cut carpet.

Materials Required: Sealant or caulk to seal cover to floor and block water.

Installation Instructions

1. Remove the old RPT cover by unscrewing the four #8-32 screws, exposing the mounting ring (See Figure 1).
2. PREPARE FLOOR FOR COVER INSTALLATION: TILE, WOOD, CARPET, and LINOLEUM: remove or install floor material leaving a 7" diameter opening around center of poke through. CONCRETE: no preparation required (See Figure 2).
3. Install the provided mounting plate to the exposed mounting ring using the four FHMS #8-32 screws provided with cover.
4. APPLY SEALANT TO FLOOR: CARPET AND CONCRETE: Apply complete bead of sealant or caulk directly to concrete around mounting plate to within 1/4" from outside edge of plate. On carpet, keep sealant within 7" diameter cut-out. TILE, WOOD and LINOLEUM: Apply moderate amount of sealant directly on finished floor next to cut-out edge. Fully surround 7" diameter opening in floor. Use enough sealant to block water entry.
5. Install new RPT MOPTITE® cover using four oval head #6-32 screws provided with cover. Clean excess sealant from around cover edge.
6. If cover is installed on concrete floor and no finished floor is planned, grout outside bottom edge of cover to fill gap.
