

PRODUCT SPECIFICATION SHEET
I T C
200A Dead-break Bail Assembly
150TB3

Application:

The ELASTIMOLD 150TB-3 bailing assembly kit consists of two pieces of flat stainless steel stock, which are designed for connecting the hold-down bails supplied with the ELASTIMOLD dead-break elbow connectors 156LR. This kit enables the dead-break elbow connectors to be positively secured to an ELASTIMOLD tee connector, K150T, or in-line junction, K150S, minimizing the possibility of being dislodged due to cable movement.

Ordering Instruction:

To order, please specify **150TB-3**.
