

Elastimold multi-point junctions are available in 2, 3, 4, 5 or 6 point configurations with 15, 25 or 35kV ratings. Units feature modular design flexibility, allowing selection of any combination of 200 Amp deepwell or 600 Amp bushing interfaces located on standard 4" or optional 6 1/2" centers. The 6-1/2" center spacing is especially well suited for Distributed Switchgear applications including fused elbow, MVI fault interrupter, MVS switch, etc.

Designs incorporate lightweight, damage resistant, EPDM molded rubber construction and corrosion resistant 304 stainless steel mounting brackets. Junctions are maintenance-free, fully shielded, deadfront and submersible. Units are ideally suited for subsurface, padmount, indoor and outdoor vault applications.

Elastimold multi-point junctions provide a convenient method for connecting, looping and tapping of 200 and 600 Amp elbows and other accessories at a common location where utilization of space, cable training, flexibility and operability are important.

* When there is a 200 Amp Interface on one side of the junction and a 600 Series Interface on the other side, always start with the 200 Amp side.

Ordering Example A

To order a 4-point, 15kV junction with 4" spacings and 600 series interfaces on the outside ways and 200 Amp wells on the inside ways specify: Catalog Number J4-6226-15.

Ordering Example B

To order a 6-point, 25kV junction with 6-1/2" spacings and 600 series interfaces on the ways 1, 3, 4, 6 and 200 Amp wells on the ways 2 and 5 specify: Catalog Number J6-626626-25-SV.

N1. The 6-1/2" wide spacing is necessary if the junction is to be used to connect with a single phase MVS Molded Vacuum Switch or MVI Molded Vacuum Interrupter.

N2. Also available with a shorter bracket without parking stands, consult factory.
